LET'S TALK ABOUT AGILE

AGILE MANIFESTO

We are uncovering better ways of developing software by doing it and helping others do it. Through this work we have come to value:

- **Individuals and interactions** over processes and tools
- **Working software** over comprehensive documentation
- **Customer collaboration** over contract negotiation
- **Responding to change** over following a plan

That is, while there is value in the items on the right, we value the items on the left more.

AGILE PRINCIPLES

4. Business people and developers must **work together daily** throughout the project.
6. The most efficient and effective method of conveying information to and within a development team is **face-to-face conversation**.
11. The best architectures, requirements, and designs emerge from **self-organizing teams**.
